DETAILED ACTION

1. This action is responsive to the Applicant's response filed 5/23/2005.

As indicated in Applicant's response, claims 10-13 and 23-26 have been canceled.

Claims 1-9, 14-22, and 27-29 are pending in the office action.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cathrine Kinslow, reg. # 51886 on 6/15/05.

The application has been amended as follows.

In the CLAIMS:

Claim 14:

An apparatus for providing metadata comprising:

a processor;

first implementation means for providing an object descriptor interface;

first creation means for creating a object descriptor class for an object using the object descriptor interface;

first exposing means for using methods defined by the object descriptor interface to identify a property of the object;

second implementation means for providing a property descriptor interface;

Art Unit: 2193

second creation means for creating a property descriptor class using the property descriptor interface; and

second exposing means for using methods defined by the property descriptor interface to obtain metadata associated with the identified property.

Claim 27:

A ~~computer program product, in a~~ computer readable medium,

for defining metadata, ~~comprising~~ having stored thereon:

instructions for providing an object descriptor interface;

instructions for creating an object descriptor class for an object using the object descriptor interface;

instructions for using methods defined by the object descriptor interface to identify a property of the object;

instructions for providing a property descriptor interface;

instructions for creating a property descriptor class using the property descriptor interface; and

instructions for using methods defined by the property descriptor interface to obtain metadata associated with the identified property.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. Claims 1-9, 14-22, and 27-29 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken separately or jointly does not suggest or teach the following features.

A method, an apparatus and computer readable medium with instructions for respectively providing or defining metadata, comprising steps, means or instructions for (i) creating an object descriptor interface; creating a object descriptor class using the object descriptor interface; (ii) using methods defined therein to identify a property of the object; (iii) providing a property descriptor interface and creating a property descriptor class using this property descriptor interface; and (iv) using methods defined therein to obtain metadata associated with the identified property, as recited in claims 1, 14 and 27.

JDK 1.1.8, "Version 1.1.8 of Java Platform API Specification", discloses defining methods in a object descriptor interface to identify a property of one object, creating a property descriptor class for the property of one object; and defining methods for the property descriptor interface associated with the property of one object; but fails to teach or suggest a same object property descriptor associated with a same object descriptor from using the descriptor interfaces in the exact sequence to get metadata as recited steps (i) through (iv) from above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
